DESIRE2LEARN TRAINING SERVICES

Our training programs are geared to match our clients' needs. We help clients achieve their goals and get them up and running quickly so they can focus on what matters most to them – teaching and learning. We provide a wide range of training topics and work with each of our clients to design a customized training approach. To ensure we meet end-user requirements and training objectives, we provide the opportunity for clients to help shape our training offerings.

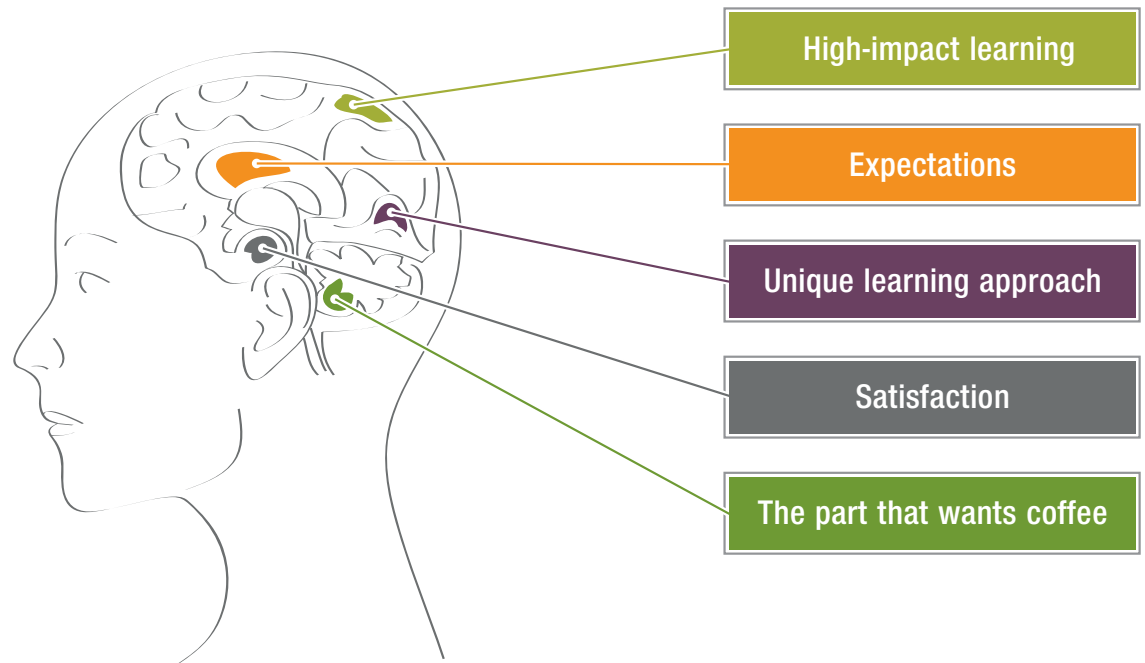

KEY BENEFITS OF TRAINING SERVICES

MAXIMIZE POTENTIAL | Our performance-based training programs are designed for high-impact learning and the immediate application of knowledge.

ACHIEVE GOALS | Every step of the way, we are committed to client success. We work closely with each client to ensure our training programs exceed their expectations. We strive to help clients attain organizational goals and maximize their investment.

CUSTOMIZE SESSIONS | Whether clients choose virtual, onsite, self-paced or blended training, they select the most suitable delivery method for their school.

INCREASE STUDENT SATISFACTION | Once training is completed our clients apply sound learning theory to develop and deliver creative, interactive courses that engage their students and increase overall satisfaction, adoption, and student engagement.

Focus on what matters | Our training programs help clients meet their specific training objectives

CUSTOMIZED, HIGH-IMPACT LEARNING

We offer a wide variety of training delivery methods to suit client needs. Through a consultative process, we work with our clients to shape the training courses. We design and develop specific training programs to encompass the diversity of each client's requirements.

Self-Paced

Activity-based online courses include tutorials and a wealth of learning materials and options to support the range of learning preferences and pre-dispositions. Courses are made available for a variable amount of time typically ranging from 30 days to 6 months.

Virtual

Virtual training conducted by our expert trainers through online web sessions are a cost effective alternative to face-to-face training.

Face-to-Face

Many of our clients choose this option. Our trainers deliver hands-on workshops onsite at our clients' locations and share best practices on teaching and learning. Training typically takes place in a lab setting with each participant working from their own training course.

Blended

Our clients often require blended training solutions, so we configure their sessions to suit their needs through unique combinations of face-to-face, self-paced, virtual and technology-based interaction. A typical session may involve intensive onsite training, followed by virtual sessions with participants.

“The training that has been available has been exceptionally good. It doesn't take a long time to become an adequate user, and it doesn't take a long time to become a proficient user. With the tools that are coming out now it's becoming even easier, and the quality of courseware you are able to develop is incredible.”

Clint Surrey | Educator and Course Developer
South Island Distance Education School
